ASSESSMENT

Oriana House, Inc., is required to abide by the PREA Standards for Community Confinement Agencies that were enacted in June 2012. Oriana House has an existing zero-tolerance policy and procedures.

- There were five reported incidences of sexual abuse during 2017 calendar year.
- The agency has increased the required mandatory training for all agency staff. Training is completed monthly on various PREA topics in each facility. The agency will continue to ensure that all new employees are trained on PREA standards.
- Updated memos were sent out to all facility PREA Managers to assist with training staff and handling PREA allegations received. These memos were reviewed to clarify any questions raised in trainings or any policy revisions.
- Executive staff will continue to insure that policies and procedures are regularly reviewed and updated. In addition, executive staff will ensure that all incidents involving PREA standards will continue to be reviewed by the Incident Review Committee. Recommendations from the Incident Review Committee will be reviewed by executive staff for feasibility and implemented if approved. Upon admission, clients are provided with a handbook informing them of their rights and options related to sexual assault, sexual abuse, sexual harassment, and/or retaliation. Clients are required to sign an acknowledgment that they have received the necessary PREA information.
- As a result of the reported numbers of sexual abuse that occurred this year, the following preventative measures were put in place:
 - The need for additional mirrors and cameras were assessed at each facility where incidents occurred. Mirrors and cameras were placed in all identified potential blind spots to increase visibility.
 - Shower curtains that contained a clear top and bottom, but a non-clear panel in the middle, were installed in each facility. The curtains increased visibility into each shower stall but still provided adequate privacy to cover any breasts, buttocks, and genitalia.
 - The showers were identified as a potential area of concern. Therefore, staff circulations have been increased during all designated shower times.
